

I am a happy XM user. I listen to XM all the time because of it's variety of channels and ability to never have to hear commercials. Traditional radio cannot offer that. XM recently started offering Local Weather and Traffic to it's users. As this hasn't become available for Nashville, this really would help because you won't have to switch to the Traditional Radio and wait for the updates. XM provides this service 24/7, unlike Traditional Radio which provides on the half hour or whenever they feels like it. Could you please allow XM and Sirius to keep this service so it's not to take our rights as paying subscribers away.

Thanks,

Chris Kennedy
